DETAILED ACTION

Allowable Subject Matter

1. Claims 1- 11, and 13 - 18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 8, 10, and 11 , for example, which include a method for compensating polarization mode dispersion compensator comprising the steps of detecting an output of optical signal and controlling an optical signal so that output of an optical signal is maximized through rotation of a plane of polarization of an optical signal (claims 1, 8, and 10); and a plurality of polarization mode dispersion compensators each of which includes a polarization rotator, a polarizer and an optical electric power detector between transmitter and a receiver (claim 11) (note: claim 11 allowed previous office action).
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
